Marathon Equipment Company  
Technical Bulletin #139-02  
Effective: October 9, 2002

**Machines Effected:**

V-4224 StockRoom Baler

**Improvement:**

Marathon has added a printed circuit board to the V-4224 StockRoom Baler, similar to our heavy-duty vertical balers. The printed circuit board makes for a cleaner panel box and removes all timers, relays and other individual components except the motor starter and fuse holder. This feature helps make servicing easier.
