

STATIONARY COMPACTORS

RJ-325 & RJ-325HD

Stationary Compactors

RJ-325 Series Features

- ▼ Designed to handle heavy-duty waste streams.
- ▼ Ideal for municipal drop-off centers.
- ▼ Heavy-duty design and high compaction force yield excellent volume reduction with MSW.
- ▼ User-friendly 48" deck height offers a standard deck height while maintaining the same clear-top opening as a 4yd. compactor.
- ▼ Remote Monitoring System can be added to many of our most popular compactors. For information about adding remote monitoring, please contact your Marathon salesperson.

RJ-325

RJ-325HD

The Worldwide Compaction Leader

Marathon® Equipment is known throughout the world as one of the leading manufacturers of quality on-site waste compaction products. The RamJet® brand has been the industry standard for quality and innovation for more than 50 years, and includes stationary and self-contained compactors, compaction containers, apartment and high-rise compactors, pre-crushers, auger-style compactors, transfer systems, and a wide array of options for virtually any application.

STATIONARY COMPACTORS

RJ-325 Compactor

Overview

Perfect for:

Municipal Recycling
Drop-Off Centers

Larger Warehouses

Manufacturing Facilities

Distribution Centers

Side-Mount Power Unit

The RJ-325 and RJ-325HD come standard with a side-mount power unit. This provides the convenience and ease-of-maintenance of a remote power pack with the space savings of an integrated power unit.

Why the RJ-325 Is the Preferred Choice

Marathon brand components are selected for longevity and minimum maintenance, with special attention given to the selection of high-duty-cycle components. Stress engineering provides the optimum degree of structural integrity. Only the best materials are used and the highest standards of quality are observed in the manufacturing process.

The RJ-325 Series Compactor

The Marathon RamJet RJ-325 series is a proven workhorse with excellent capability, ensuring top performance in heavy commercial and industrial applications. The RJ-325 is unique to other compactors in its class, providing a large 60" wide by 67 1/2" clear-top opening, and a 33" deep charge box – a feature for peak loading times or when compacting bulky items.

Engineered for Durability

The RJ-325 is stress-engineered for durability, adding strength where it belongs. The 1/2" charge box floor is reinforced with seven heavy-duty steel channels, the 1/2" steel plate ram face is backed with 10" structural channels and extra-rugged reinforced sides.

Cart Dumpers, Chutes, and Hoppers Available

These stationary compactors can be fitted with a variety of material handling equipment such as chutes, hoppers, and dumpers. The compactor shown is fitted with a side-fed hopper and a ground level dumper. Cart dumpers can be custom built to your specifications to accommodate existing cart systems.

STATIONARY COMPACTORS

RJ-325HD Heavy-Duty Compactor

Overview

Perfect for:

Municipal Recycling
Drop-Off Centers

Larger Warehouses

Manufacturing Facilities

Distribution Centers

Ram Guide System

The packing ram is supported by specially formulated cast iron shoes which ride on replaceable wear strips. This exclusive design protects the charge box floor from the full force of the packing ram, extending its life and dramatically reducing compaction robbing friction.

Why The RJ-325HD Is the Preferred Choice

Marathon brand components are selected for longevity and minimum maintenance, with special attention given to the selection of high-duty-cycle components. Stress engineering provides the optimum degree of structural integrity. Only the best materials are used and the highest standards of quality are observed in the manufacturing process.

The RJ-325HD Compactor

The large 59 1/2" wide by 67 1/2" long clear-top opening and superior strength of the RJ-325HD make it just right for large volumes of crates, skids, and other hard-to-compact industrial refuse and trash. Waste is crushed to a fraction of the original bulk.

Heavy-Duty Design

The Marathon RJ-325HD is engineered with extra steel to meet the demands of heavy-duty industrial use. Cylinder supports, a 1" thick breaker bar, a 3/8" ram top, and extra side supports are added for superior endurance. Also standard on the RJ-325HD are 1/4" thick steel charge box liners and a 1/2" thick abrasion-resistant steel plate on the charge box floor.

Control Station

The RJ-325 and RJ-325HD feature an advanced, simplified three-button control system. It is key-operated, fully automatic, and contained in a weatherproof NEMA 4 enclosure. Connected to the power pack with 13' of conduit, the controls can be mounted in your choice of location for operator convenience.

MARATHON WARRANTY

Marathon® Equipment is pleased to announce the release of our updated Warranty Coverage program. This warranty will take effect and be applicable on all products sold on or after June 1st, 2021. Note that this warranty plan is not retroactive to products sold prior to June 1st, 2021.

Marathon Compaction Solutions Warranty

3 Yr. Structural, 2 Yr. Parts, 1 Yr. Labor

Our existing Signature Series Warranty, Compactor Warranty, and Auger Warranties have been combined into a new Compaction Solutions Warranty. The Compaction Solutions Warranty includes **3-years structural warranty, 2-years part warranty, and 1-year labor warranty.**

Worry-Free, Lowest Life-Cycle Cost

You have great options for equipment acquisition. Choose from a new Marathon® compactor or baler, or get a Marathon Certified Remanufactured product backed by the same best-in-industry warranty of a new Marathon product.

Our multiple extended warranty options, preventive service and maintenance programs, OEM parts, and asset connectivity all combine to optimize the performance of your equipment.

Digital connectivity monitors your assets ensuring predictive and condition-based equipment maintenance. Eliminate the costs associated with unnecessary down time and repairs. Service only when needed and replace only when and what is needed.

GOT CORES? TRADE IN - TRADE UP!

Through our Marathon Certified Remanufactured compactor and baler program, you can now establish a true closed-loop recycling process, which not only includes your commodities, but also your equipment.

The Marathon Certified Remanufacturing program allows you to purchase a factory-certified remanufactured product with the same warranty as a brand new one, providing a solution to optimize recycling commodities AND equipment.

For more information on the Marathon Cores Program, contact your local dealer.

1 BACK-OF-STORE CONNECTED ASSET SOLUTIONS

The ultimate solution for peace of mind, efficiency, and productivity.

Marathon provides a full suite of value-added needs.

2 monitoring to minimize your waste-related expenses and maximize recycling revenue. Digital connectivity enables asset monitoring, assists with predictive maintenance, and connection to hauler operations. Partnership with Marathon supports your long-term sustainability objectives - and provides documentary evidence of your performance.

Digital connectivity enables asset monitoring, assists with predictive maintenance, and connection to hauler operations.

Partnership with Marathon supports your long-term sustainability objectives - and provides documentary evidence of your performance.

All the information you need at the tips of your fingers.

3rd-Eye provides a complete dashboard view of the waste and recycling programs for your entire enterprise.

**BEST BRAND. UNMATCHED CUSTOMER VALUE.
ALL EYES ON YOUR BUSINESS.**

- Availability and predictability of assets
- Preventative Maintenance & Service Agreements
- Extended Warranty options
- OEM Parts
- Marathon Certified Remanufacturing with the same warranty as new

- Right product in the right bucket
- Traceability and control of recycling material
- Enterprise tracking for sustainability goals and measurement
- Reduce contamination

- Ensure you have the right equipment
- Pick up when full and not early.
Minimize disposal costs
- Remote fullness monitoring & bale weight monitoring
- Maximize recycling revenue
